Mallery Financial LLC

4172 Kildare St.

Eugene, OR 97404

(541) 687-7678

March 7, 2022

This Brochure provides information about the qualifications and business practices of Mallery Financial LLC (“Adviser,” “Mallery Financial,” “us,” “we,” “our”). If you have any questions about the contents of this Brochure, please contact us at (541) 687-7678 or by email at stephen@malleryfinancial.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

Additional information about Mallery Financial is also available at the SEC’s website www.adviserinfo.sec.gov. You can search this site by using a unique identifying number known as a CRD number. The CRD number for Mallery Financial is 310425. The SEC’s website also provides information about any persons affiliated with Mallery Financial who are registered, or are required to be registered, as investment adviser representatives (IARs) of Mallery Financial.

Mallery Financial is a registered investment adviser. Registration of an investment adviser does not imply any level of skill or training. The oral and written communications of an adviser provide you with information that you may use to determine whether to hire or retain them.

Item 2 – Material Changes

This section of the Brochure will discuss only the specific material changes that were made to the Brochure since our last annual update. We have made the following material changes to our brochure since last annual update in March 2021.

Item 4:

- We have updated the section discussing third-party money managers to clarify that Mallery Financial assumes discretionary authority to add or remove a third-party money manager and/or reallocate clients' assets to other managers.
- We have a section discussing Vise AI Advisors, LLC, an internet-based third-party money manager with whom we have agreement.

Item 5:

- We have added a disclosure explaining advisory fees by third-party managers are separate and apart from Mallery Financial's advisory fees.

We will ensure that you receive a summary of any material changes to this and subsequent Brochures within 120 days of the close of our business's fiscal year end, which is December 31. We will provide other ongoing disclosure information about material changes as they occur. We will also provide you with information on how to obtain the complete brochure. Currently, our Brochure may be requested at any time, without charge, by contacting Stephen Mallery at (541) 687-7678 or stephen@malleryfinancial.com.

Item 4 – Advisory Business Introduction

Our Advisory Business

Mallery Financial is a registered investment adviser with the State of Oregon. The Adviser was founded in 2020 by its principal owner and Chief Compliance Officer (“CCO”) Stephen Mallery.

Our Services

Mallery Financial offers financial planning, investment management, and insurance consulting services to individuals, businesses, retirement plans and their sponsors, non-profit organizations, trusts, and estates. Our overall philosophy is rooted in thoroughness of understanding (of you, your financial needs and objectives, the overall context of your financial circumstances, and of our recommendations) and in delivering as much clarity as possible in our research, analysis, advice, and recommendations. We believe the best decisions are made 1) in the presence of full and complete information about factors relevant to the situation/decision, and 2) when you are empowered with information and context, including risks, limitations, and other potential downsides as well as strategic opportunities and personalized solutions. Our goal is to help you move forward with confidence in a well-grounded long-term plan.

Fiduciary Standard of Care

Mallery Financial is committed to the fiduciary standard of care. The fiduciary standard of care means that we are legally as well as ethically obligated to put your interests first, to pledge our primary loyalty to you, to make recommendations without regard to compensation to us, and to avoid conflicts of interest and disclose and minimize them when they exist.

Asset Management

Fiduciary Investment Process

Mallery Financial follows a fiduciary process rooted in knowing the client, making personalized recommendations specific to the client’s needs and best interests, and managing an objective, consistent process for investment selection, portfolio construction, implementation, monitoring, reporting, and ongoing servicing of client Account(s).

Understanding You

We will meet with you, collect information, and discuss your financial circumstances, investment objectives, risk tolerance, time horizon, liquidity needs, and other factors that may be relevant to your situation. In managing your Account(s) we will rely on the personal and investment information you provide to us.

Making Recommendations

Based on the information you share with us, we will recommend an investment strategy and structure designed to meet the needs of your investment objectives, time horizon, risk tolerance, liquidity considerations, and exclusion/inclusion requests.

Our investment recommendations will include either a tailored portfolio, one or more of our model portfolios, a strategy offered by a third-party money manager, or a combination thereof (more information on available investment strategies is provided below).

Implementation

The specifics of the agreed-upon investment strategy will be documented in our Investment Advisory Agreement before implementation.

Our goal is to manage a “concierge” type of experience for new-account implementation. We prepare new-account paperwork for your signature, ensure the account is properly opened and funded, set up your client portal for account monitoring and reporting, and ensure you can successfully log in.

In some situations, securities from outside accounts may be transferred into your advisory Account; however, we may recommend that you sell a particular security if we believe it is not suitable for the recommended investment strategy. Additionally, trading may be required to meet asset allocation targets, either initially, after substantial cash deposits, and/or after a request for a withdrawal and/or liquidation of a position.

Monitoring and Reporting

We monitor client accounts on a periodic basis to help ensure that they continue to conform to your objectives, risk tolerance, and other terms documented in our current Investment Advisory Agreement with you.

You will be notified of any purchases or sales through trade confirmations and statements that are provided by the Custodian. These statements list the total value of the Account, itemize all transaction activity, and list the types, amounts, and total value of securities held. You will at all times maintain full and complete ownership of all assets held in your Account, including the right to withdraw securities or cash, vote proxies, and receive transaction confirmations.

We will also provide you with quarterly performance statements. These statements give you additional feedback about performance, asset allocation, and inflows and outflows. From time to time, we may also use the delivery of these statements or other means to educate you about our long-term investment philosophy or to describe any changes in current strategy and asset allocation along with the reasons for making these changes.

Tailored Asset Management Services

Custom-tailored portfolios span two major categories.

Security Exclusion/Inclusion

One category of custom-tailored portfolios is where you request us to restrict or include specific securities or security types from your Account – for example, individual companies, asset classes, industry sectors, or other restrictions. Such requests typically are made in the context of socially responsible investing (SRI); environmental, social, and governance (ESG) criteria; religious beliefs; or other values-based desires or beliefs. Mallery Financial supports values-based investing and will work diligently to tailor your portfolio to your requests to the greatest extent possible.

Special-Purpose Accounts

A second category of custom-tailored portfolios includes legacy stock and/or bond accounts, work-out strategies for stocks with high embedded unrealized gains, focused dividend strategies, insurance-backed investment strategies, and other account types and strategies that are unique and specific to

your circumstances. Mallery Financial will accommodate special-purpose accounts to the greatest extent possible.

These categories are not mutually exclusive and may overlap.

In all cases, our recommendations and ongoing management are based upon your investment goals, objectives, risk tolerance, time horizon, liquidity needs, personal and values-based preferences, and other factors relevant to your situation. We will monitor the Account, trade as necessary, and communicate regularly with you.

Model Portfolios

Based on information provided by you, we may recommend one or more model portfolios to meet your investment needs based on your objectives and tolerance for risk.

Mallery Financial model portfolios embody our research and current thinking on market opportunities, risk management, and best execution. They span the full range of growth/risk investment objectives from very conservative to aggressive growth and every decile in between. Further information on Mallery Financial models is presented below under Item 8 – Methods of Analysis, Investment Strategies, and Risk of Loss.

We work with third parties to provide access to model portfolios dedicated to socially responsible investing (SRI) and investing in alignment with religious values.

Third-Party Money Managers

Based on information you provide to us, we may recommend clients use the services of third-party managers to manage all, or a portion, of their investment portfolio. We have access to third-party managers through the investment platforms we use for client accounts or through our own engagements.

Third-party manager programs allow you to access portfolio management services that typically otherwise require higher minimum account sizes if pursued outside of the program we offer. The money managers we select or recommend will have discretion to determine the securities they buy and sell within the Account, subject to reasonable restrictions imposed by you. Due to the nature of these programs, each of the independent money managers is obligated to provide you with a separate disclosure document. Please carefully review that document for important and specific program details, including pricing.

When we refer the management of your Account(s) to a third-party money manager, we will provide ongoing monitoring on the manager managing your assets and provide you with feedback, guidance, and performance reporting. We will also assume discretionary authority to hire and fire the third-party money manager and/or reallocate our clients' assets to other third-party money managers where we deem such action appropriate.

Vise AI Advisors, LLC

We currently have an agreement in place with Vise AI Advisors, LLC (“Vise”), an internet-based investment adviser that uses artificial intelligence, algorithms, and other technological means for the provision of investment advisory services to investment advisers like Mallery Financial and their individual clients. Vise’s investment advice is delivered exclusively based upon information we submit to Vise through a

web-based investment questionnaire. Client responses to the electronic questionnaire are used to create a custom portfolio based on the clients' risk profile and investment preferences. After submission of the online investment questionnaire, the Vise technology platform will provide to Mallery Financial automated portfolios that may include ETFs, mutual funds, and/or individual debt and equity securities. It is then our responsibility to determine whether the proposed portfolio is appropriate for our client. Once we finalize the proposed portfolio for our client, the platform will automatically process the transactions.

Mallery Financial (not Vise) is responsible for ensuring our clients' information remains current and accurate, including suitability and investment objectives. Clients will receive Vise's Form ADV Part 2 brochure when we recommend use of this third-party manager, and we encourage you to read it carefully for details concerning Vise's investment methods, fees, risk, conflicts of interest, and other details. Please see Item 5 of this brochure for details relating to Vise's fees.

Interval Funds

Selected interval funds are available through Mallery Financial advisory accounts. Interval funds are closed-end funds that allow investors to diversify their portfolios and to invest in alternative products that would normally have limited availability to retail investors. Alternatives are defined as anything that is neither a stock, nor a bond, nor cash; for example, real estate. Interval funds have limited liquidity, and liquidation/withdrawal and repurchase offers are made only on a periodic basis, such as quarterly. During the liquidation period, an investor may be able to redeem all, a portion, or none of the shares they own, depending on the overall demand for liquidations from all shareholders. Risks for interval funds can be greater than and different from those of other investment products. You should carefully read the prospectus for information about the material risks with these funds and other disclosures before making a decision to invest. The fund prospectus will be available through either Mallery Financial or the sponsor.

Custody of Client Assets

If you decide to implement our recommendations, we facilitate the opening of a custodial account(s) with TD Ameritrade, Folio Institutional, or a specialty platform we believe to be in your best interests based on your situation, goals, or preferences. The funds in your Account will be held in a separate Account, in your name, at an independent custodian, and not with us.

Taxes

You will be responsible for all tax consequences resulting from the sale of any security, rebalancing, or reallocation of the Account. You are responsible for any taxable events in these instances. We are not tax professionals and do not give tax advice. However, we will work with your tax professionals to assist you with tax planning.

Wrap Fee

We do not sponsor or participate in a third-party sponsored wrap fee program.

Assets Under Management

As of December 31, 2021, we managed \$30,162,701 in discretionary assets and \$7,642,017 on a non-discretionary basis.

Planning and Consulting Services

Retirement Plan Consulting Services

We offer financial advisory and consulting services to employee benefit plans and their fiduciaries based upon the needs of the plan and the services requested by the plan sponsor or named fiduciary. In general, these services may include an existing plan review, formulation of the investment policy statement, asset allocation advice, vendor selection advice, non-discretionary portfolio management services, investment performance monitoring/benchmarking services, and ongoing consulting, communication, and participant education services/seminars. We may also assist the plan sponsor in providing participant enrollment meetings.

Certain plans/clients that we may provide these services to are regulated under the Employee Retirement Income Securities Act of 1974 (“ERISA”). We will provide pension consulting services to the plan sponsor and/or fiduciaries as described above for the fees set forth in Item 5 of this brochure. The consulting services we provide are advisory in nature. In providing services to any plan and its underlying participants, our status is that of an investment advisor registered under the Securities Act of the State of Oregon and/or other states’ securities laws. We are not subject to any disqualifications under Section 411 of ERISA. In performing fiduciary services, we are acting as a fiduciary of the plan as defined in Section 3(21) under ERISA, only. In all cases, our status as a fiduciary under ERISA is clearly disclosed in a written advisory agreement. If there is any discrepancy between the disclosures in this paragraph and the agreement, the agreement shall govern.

Financial Planning

Our financial planning services span the range from abbreviated, generalized planning and basic projections, to full cash-flow planning with “what if” scenarios, stress testing, detailed modeling of prospective plan solutions, and a written narrative. After the plan has been completed, you may wish to establish an ongoing relationship with Mallery Financial for the purpose of keeping the plan up-to-date and/or to retain periodic access to the Adviser’s advice.

The financial planning relationship typically consists of meetings (in person, by phone, or using a virtual meeting platform) focused on getting to know you and the relevant facts and context of your situation, and subsequent meetings with you and/or your other advisors (attorneys, accountants, etc.) as necessary to complete the goals and objectives of the planning engagement. In addition to non–investment-related considerations, we will discuss your investment objectives and incorporate an investment structure into the overall financial plan. We will discuss your investment preferences and provide you a risk profile report based on your responses to an in-depth questionnaire.

For us to complete the plan it is essential that you provide the information and documentation we request (regarding, for example, your income, investments, taxes, insurance, estate plan, etc.). It is your responsibility to inform us of any changes. We do not verify any information obtained from you or from your attorney, accountant, or other professionals, though we have a strong preference to see and use source documentation as the basis of our work.

Insurance Consulting

Insurance consulting spans the range from in-force policy analysis (suitability, costs, forensics, repair) to providing analysis and advice on new insurance purchase decisions (needs analyses, recommendations on product type/category and material explanations as to why, and, if desired, specific product research). We can also work with you to manage in-force insurance contracts (for example, life insurance and annuities) if you can authorize the insurance company to give us access to policy information.

Other Financial Consulting

We also offer a la carte or specialized consulting services on a fee-for-service basis. These projects may focus very narrowly on a specific issue or may address financial concerns that fall outside the typical categories of financial planning or insurance consulting. Fees and other provisions are the same as described in Financial Planning and Insurance Consulting, above, and below in Item 5 – Fees and Compensation.

Client's Freedom in Implementation

Mallery Financial's planning and consulting work may result in actionable recommendations. You are under no obligation to implement recommendations through us. You may implement your financial plan through any financial organization you choose.

Potential Conflicts of Interest

Some recommendations may result in additional compensation to Mallery Financial and Stephen Mallery. Such circumstances create the conditions where a conflict of interest exists (the possibility of additional compensation may affect Mallery Financial's judgment when making recommendations). We require that all investment adviser representatives disclose this conflict of interest when such recommendations are made and to advise you that you are not obligated to implement such recommendations or to implement them through Mallery Financial.

Important Information for Retirement Investors

When we recommend that you rollover retirement assets or transfer existing retirement assets, such as a 401(k) or an IRA, to our management, we have a conflict of interest. This is because we will generally earn additional revenue when we manage more assets. In making the recommendation, however, we do so only after determining that the recommendation is in your best interest. Further, in making any recommendation to transfer or rollover retirement assets, we do so as a "fiduciary," as that term is defined in ERISA or the Internal Revenue Code, or both. We also acknowledge we are a fiduciary under ERISA or the Internal Revenue Code with respect to our ongoing investment advisory recommendations and discretionary asset management services, as described in the advisory agreement we execute with you. To the extent we provide non-fiduciary services to you, those will be described in the advisory agreement.

Item 5 – Fees and Compensation

Asset Management and Retirement Plan Consulting Fees

We charge annual asset-based management fees in connection with our rendering of Asset Management services and/or Retirement Plan Consulting services based on the tiered fee schedule shown below. These fees are typically charged monthly in arrears, based on the average balance of your Account (calculated

using information provided by the Custodian) during the billing period. In rare instances, exceptions to this billing structure may occur as a result of the billing practices required by the sponsors of certain third-party money management platforms we may recommend to you. Any such exceptions will be agreed upon in writing with the client. Clients may add or withdraw funds from the Account at any time; however, the average balance of your account used for calculating our advisory fees may be adjusted on a pro-rata basis for any such mid-period additions or withdrawals (in the case of deposits, weighted to address the number of days an increased amount of assets was managed by the firm, and in the case of withdrawals, weighted to address the number of days a reduced amount of assets was managed by the firm).

Our fees for these services are charged on a blended basis from the first dollar under our management. Multiple accounts of immediately related family members at the same mailing address will be considered one consolidated account (i.e., “household”) for billing calculation purposes. We may also consolidate employer-sponsored retirement plan participants (SEP IRAs, SIMPLE IRAs) into a single group for billing calculation purposes.

Standard Fee Schedule

Assets Under Management	Annual Fee (%)
\$0-\$50,000	1.25%
\$50,001-\$500,000	1.00%
\$500,001-\$1,000,000	0.85%
\$1,000,001-\$2,000,000	0.60%
\$2,000,001-\$5,000,000	0.45%
\$5,000,001-\$10,000,000	0.35%
>\$10,000,000	0.25%

Our asset-based management fees shall be calculated in accordance with the following formula:

(Average Periodic Balance) x (Applicable Annual Fee) x (Period as a Fraction of the Year) = Monthly Asset-Based Fee.

For purposes of illustration only, a household with an average balance of \$600,000 at the end of the billing period will pay a monthly asset-based management fee as follows:

1.25% on the first \$50,000 ($\$50,000 \times .0125 = \625 ; $\$625 \times (1/12) =$ \$52.08

1.00% on the next \$450,000 ($\$400,000 \times .01 = \$4,500$; $\$4,500 \times (1/12) =$ \$375.00

0.85% on the remaining \$100,000 ($\$100,000 \times .0085 = \850 ; $\$850 \times (1/12) =$ \$70.83

Total Monthly Fee: **\$497.91**

The fees shown above are annual fees and may be negotiable at the Adviser’s discretion and in all cases will be documented in the Investment Advisory Agreement. The negotiated fee will in no case be greater

than the blended fee calculated using the applicable fee schedule. Once an Investment Advisory Agreement has been executed, no increase in the annual fee will be effective unless it has been agreed to in writing by the client.

Fees for one Account may be billed to another Account; for example, you may wish to maximize your IRA and choose to pay the fees for the IRA from another account. In such cases the total fee charged would not change because fees are based on total assets under management, not per account.

Mallery Financial believes its advisory fees are reasonable considering the fees charged by other investment advisers offering similar services/programs. Your investment plan may involve paying additional advisory fees to a third-party money manager, if such a manager is selected and depending upon which manager is selected.

Payment of Fee

Most clients choose to have their advisory fee debited directly from their custodial Account, but you also have the option of being invoiced directly. If the fee is to be deducted from your custodial Account, you agree to authorize the Custodian to pay the Account's investment advisory services fee directly to Mallery Financial. If you do not want us to charge your Account for the fee, you may pay the fee directly to us. We will send you an invoice detailing the fee calculation. Directly invoiced fees are due in full fifteen (15) days after receipt of the invoice.

Fee withdrawals will occur no more frequently than monthly from your Account unless you and we specifically agree.

We do not debit advisory fees directly from your advisory Account. We send information to your Custodian to debit the advisory fees, and the Custodian pays them to us.

The Custodian will send you a statement, at least quarterly, indicating all amounts disbursed from the Account, including the fee paid directly to Mallery Financial. Mallery Financial's access to the assets of the Account will be limited to trading, direct deduction of advisory fees (if so authorized by the client), and facilitating Client-directed cash flows (executing contributions to or withdrawals from the Account at the Custodian based your instructions).

Third-Party Money Managers

When you invest with a third-party manager, Mallery Financial receives its standard asset management fee for assisting with the selection of an investment program and managing the manager (monitoring the managers, hiring and firing managers based on your objectives and manager performance, and providing you feedback, guidance, and performance reporting). For information about fees, terms, and other disclosures associated with the third-party manager, see their Form ADV Part 2 (or equivalent written disclosures), copies of which shall be provided to you at the inception of any third-party manager relationship.

Advisory fees charged by third-party managers are separate and apart from our advisory fees. Assets managed by third-party managers will be included in calculating our advisory fee, which is based on the fee schedule set forth in the Portfolio Management Services section in this brochure. Advisory fees that you pay to the third-party manager are established and payable in accordance with the brochure provided by each third-party manager to whom you are referred. These fees may or may not be negotiable. You should

review the recommended third-party manager's brochure and take into consideration both their fees along with our fees to determine the total amount of fees associated with this program.

Third-party managers are generally accessible to us and our clients only through a web-based platform. Clients may be charged a platform fee in addition to any asset management fees they are charged by third-party managers. See the section below titled Other Third-Party Fees for additional information.

Interval Funds

Management fees for investments in interval funds will be charged in your advisory Account based on the value of these investments. Because redemptions and repurchases are limited to specific liquidation periods, you will be able to implement any advice only during the liquidation period. This creates a conflict of interest because the Adviser will receive fees for this advice before the liquidation can be implemented. Mallery Financial monitors and addresses this conflict of interest by monitoring for fee overbilling and will process any excess billings by issuing a refund within 30 days.

Other Third-Party Fees

Our fees do not include brokerage commissions, transaction fees, and other related costs and expenses. You may incur certain charges imposed by custodians, third-party investment companies, and other third parties; for example, fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Investment management platforms may charge platform fees and annual account maintenance fees; see the platform's Form ADV for details. Insurance companies that provide fee-based (advisory) annuities typically charge contract fees, annual account maintenance fees, and may offer optional insurance riders that provide additional benefits in exchange for an insurance rider fee; see the product prospectus and other disclosure documents for details. Mutual funds, money market funds, and exchange-traded funds (ETFs) also charge internal management fees, which are disclosed in the fund's prospectus. These fees may include, but are not limited to, a management fee, up-front sales charges, and other fund expenses. Certain strategies offered by us may involve investment in mutual funds and/or ETFs. Load and no-load mutual funds may pay annual distribution charges, sometimes referred to as "12(b)(1) fees." These 12(b)(1) fees come from fund assets and thus indirectly from clients' assets. We do not receive any compensation from these fees. All of these fees are in addition to the management fee you pay us. You should review all fees charged to fully understand the total amount of fees you will pay. Services similar to those offered by us may be available elsewhere for more or less than the amounts we charge. Our brokerage practices are discussed in more detail under Item 12 – Brokerage Practices.

Where appropriate for the client, we may recommend that the client engage Orion Portfolio Solutions, LLC ("OPS"), as a trading platform (clearing through TD Ameritrade). If OPS is engaged for its suite of trading, reporting, and accounting services, separate and in addition to our asset-based management fees set forth above the client will pay OPS a platform fee in accordance with the following fee schedule. This platform fee covers the cost of trading, reporting, and accounting services to the client.

OPS Platform Fee Schedule

Assets Under Management	Annual Fee (%)
\$0-\$50,000	0.45%
\$50,001-\$100,000	0.30%
\$100,001-\$500,000	0.20%
\$500,001-\$1,000,000	0.15%
\$1,000,001-\$5,000,000	0.10%
>\$5,000,001	0.08%

The platform fee schedule is determined independently by OPS and may be amended at OPS's discretion, subject to the terms of its account opening agreement with the client. Mallery Financial does not share in any portion of the platform fee paid to OPS. Clients are encouraged to review OPS's most recent Form ADV Part 2 and the OPS account opening documentation for the current administration fee schedule. A copy of OPS's most recent Form ADV Part 2 is available free of charge at <https://adviserinfo.sec.gov/firm/brochure/125446>.

We have considered the management fees and other costs of third-party managers we recommend for our clients and believe these fees to be reasonable considering the service and investment options available. Your signed agreement and other account opening paperwork will detail the fees you will pay as well as the method of payment.

Termination

Should you terminate your Asset Management relationship with Mallery Financial before the end of a month, we will invoice you for the number of unbilled days in the period up to the date of termination, prorated, and payment will be due immediately.

Financial Planning, Insurance Consulting, and Other Financial Consulting Fees

Compensation Framework

Our planning/consulting process begins with a thorough intake discussion where we learn about you, your concerns, goals, priorities, and desired outcomes. Based on that discussion we offer a proposed engagement plan and fee arrangement designed to meet your objectives and desired deliverables.

Planning and consulting services are billed either at an hourly rate of \$150 per hour or on a project basis. Project-based fees are fixed for the duration of the project. Either fee arrangement will be documented and agreed upon in a written Financial Planning/Consulting Agreement. If at any time it appears that the project will take more time than estimated or grows in scope or complexity, there shall be no increase in the fee without your written consent. If you choose not to pursue the completion of services, we will provide all completed work. We will provide a refund of any unearned prepaid fees on a prorated basis, if applicable.

Payment terms are negotiable. Fees are typically billed 50% in advance, with the balance payable within 30 days or spread out in monthly installments over no more than five (5) months. At no time will we charge a fee of \$500 or more six (6) or more months in advance.

At the conclusion of the plan, if the plan is implemented through us under an Investment Advisory Agreement, we will receive separate compensation for those services (as described in the Asset Management Fee Schedule section, above). In some instances, our recommendations may involve a commissionable fixed insurance product, and Stephen Mallery may offer to implement the recommendation through his outside insurance brokerage service. In these instances, Mr. Mallery may receive a commission in connection with the sale of insurance products to clients. Please see the important disclosures below regarding certain conflicts of interest which arise under these arrangements.

The fees and expenses you pay for purchasing investment services or insurance products may be more or less than the expenses you would pay if you were to decide to implement our recommendations through another investment advisory firm, broker-dealer, or insurance broker; such fees and expenses are typically determined by the broker-dealer, investment company, or insurance company sponsoring the service or product.

Conflict of Interest Related to Compensation for the Sale of Insurance Products

Certain associated persons of our firm, including Stephen Mallery, are independently licensed to sell insurance in one or more states acting as a direct agent representative of a specific insurance company or companies. Insurance related business may be transacted with advisory clients, and licensed individuals may receive commissions from insurance products sold to clients. Clients are advised that the fees paid to Mallery Financial for investment advisory services are separate and distinct from any commissions earned by its associated persons in connection with the sale of insurance products to clients. If requested by a client, we will disclose the amount of commissions expected to be paid with respect to any insurance products.

The receipt of insurance-related commissions by any individual associated with our firm presents a conflict of interest. As fiduciaries we must act primarily for the benefit of our investment advisory clients. As such, we will transact insurance related business with clients only when fully disclosed, suitable, and appropriate. Further, we must determine in good faith that any commissions paid to our associated persons are appropriate. Clients are informed that they are under no obligation to use any individual associated with our firm for the purchase of insurance products or services. Clients may use any insurance firm or agent they choose for purchase of these products and services. We encourage you to ask us about the conflicts of interest presented by the insurance licensing of our associated persons.

Good Faith

All recommendations developed by us are based upon our professional judgment. We cannot guarantee the results of any of our recommendations.

Item 6 – Performance Based Fee and Side-by-Side Management

Performance-based fees are fees based on a share of capital gains on or capital appreciation of the assets of a client. We do not charge any performance-based fees; therefore, we do not engage in side-by-side management of client accounts.

Item 7 – Types of Client(s)

We provide investment advisory services to individuals, high net worth individuals, businesses, retirement plans and their sponsors, non-profit organizations, trusts, and estates. We have no minimum required account opening balance or annual fee requirements.

Item 8 – Methods of Analysis, Investment Strategies, and Risk of Loss

Methods of Analysis

We make use of multiple analytical disciplines as part of our overall investment management process. As part of our investment advisory services to you, the implementation of these disciplines may include any, all, or a combination of the following:

Fiduciary Analysis

Mutual funds and EFTs

Mutual funds and ETFs are amendable to a screening process that considers a set of quantitative due-diligence criteria consistent with fiduciary investment management, including:

- Regulatory oversight
- Minimum track record
- Stability of organization
- Assets in the investment
- Composition consistent with asset class
- Style consistency
- Expense ratios/fees relative to peers
- Performance relative to peers
- Risk-adjusted performance relative to peers

Stocks

Stocks can be evaluated against a wide range of publicly available company information, including fundamental analysis, technical analysis, and the company's and its industry's position relative to general macroeconomic conditions.

Modern Portfolio Theory (MPT)

Modern portfolio theory tries to understand the market as a whole, rather than looking for what makes each investment opportunity unique. Investments are described statistically, in terms of their expected long-term rate of return and their expected short-term volatility. Volatility is equated with “risk,” measuring how much worse than average (or better than average) an investment’s bad years are likely to be. The goal is to identify your acceptable level of risk tolerance, and then to build a portfolio with the maximum expected return for that level of risk (or, seen another way, to identify your desired rate of return and build a portfolio with the least risk required to achieve that rate of return).

Macroeconomic Analysis

Macroeconomics refers to the conditions of the economy as a whole. It includes consideration of macroeconomic factors such as economic growth rates, fiscal policy, monetary policy, exchange rates, inflation rates, employment rates, and consumer spending – both in the United States and across the globe. Macroeconomics considers the conditions on the ground on which companies base their business decisions and governments base their policy decisions. Macroeconomics recognizes that economies are driven by larger forces and patterns and that the global economy is intertwined and interdependent.

Environment, Social, and Governance (ESG)

Environment, social, and governance (ESG) assessment is often confused with “socially responsible investing” (SRI) and “values-based” investing. Unlike SRI, ESG does not seek to exclude specific industries based on ethical categories, but rather provides a risk assessment based on the business risks associated with a company’s business practices. For example, companies that score low in the environment category (pollution loads, regulatory compliance record, potential remediation costs, etc.), social category (community and reputational factors, workplace health and safety violations, etc.), and/or governance category (degree of accuracy and transparency in accounting practices, board member conflicts of interest, board diversity, etc.) all present risks that may negatively affect the company’s bottom line and therefore may present material risks as a prospective investment.

Fundamental Analysis

Fundamental analysis is a technique that attempts to determine a security’s value by focusing on the underlying factors that affect a company’s actual business and its future prospects. Fundamental analysis is about using real data to evaluate a security’s value. It refers to the analysis of the economic well-being of a financial entity as opposed to only its price movements.

The end goal of performing fundamental analysis is to produce a value that we can compare with the security’s current price, with the aim of determining what position to take with that security (underpriced = buy; overpriced = sell).

Technical Analysis

Technical analysis is a technique that attempts to determine a security’s value by developing models and trading rules based on price and trading volume transformation. Technical analysis assumes that a market’s price reflects all relevant information, so the analysis focuses on the history of a security’s trading behavior rather than external drivers such as economic, fundamental, or news events. The practice of technical analysis incorporates the importance of understanding how market participants perceive and

act upon relevant information rather than focusing on the information itself. Ultimately, technical analysts develop trading models and rules by evaluating factors such as market trends, market participant behaviors, supply and demand, and pricing patterns and correlations.

As with other types of analysis, the predictive nature of technical analysis can vary greatly; models and rules are often modified and updated as new patterns and behaviors develop. Past performance is not an indicator of future return.

Economic Analysis and Stress Testing

Stress testing is a risk management tool used to simulate an economic crisis and determine if such an event could impact a client's assets, and to what degree. Stress testing enables us to identify potential worst-case scenarios so that we may attempt to manage a client's exposure to risk. Based on the results of stress testing, we can take strategic actions such as adjusting economic capital levels or adjusting the portfolio mix with the hope of achieving enhanced economic returns.

Investment Strategies

The investment strategies we use to implement any investment advice given to you include, but are not limited to:

- Long-term purchases (securities held at least a year)
- Short-term purchases (securities sold within a year)

Tailored Strategies

Custom-tailored portfolios span two major categories.

Security Exclusion/Inclusion

One category of custom-tailored portfolios is where you request us to restrict or include specific securities or security types from your Account – for example, individual companies, asset classes, industry sectors, or any other restriction you request. Such requests typically are made in the context of socially responsible investing (SRI); environmental, social, and governance (ESG) criteria; religious beliefs; or other values-based desires or beliefs. Mallery Financial supports values-based investing and will work diligently to tailor your portfolio to our requests to the greatest extent possible.

Special-Purpose Accounts

A second category of custom-tailored portfolios includes legacy stock and/or bond accounts, work-out strategies for stocks with high embedded unrealized gains, focused dividend strategies, insurance-backed investment strategies, and other account types and strategies that are unique and specific to your circumstances. Mallery Financial will accommodate special-purpose accounts to the greatest extent possible.

These categories are not mutually exclusive and may overlap.

For a very few clients we offer a trading strategy based on an algorithm that indicates opportunities to buy low and sell high, making incremental buys as a stock trends lower in price and incremental stock sells as the stock trends higher in price.

Model Strategies

As stated above under Item 4 – Advisory Business Introduction – we offer model portfolios designed to align with most Clients’ risk tolerance and investment objective. The following chart shows the range of investment objectives available and their associated high-level asset allocation.

Model Name	Description
Capital Preservation	10% equities/90% fixed income
Conservative	20% equities /80% fixed income
Conservative Plus	30% equities/70% fixed income
Moderately Conservative	40% equities/60% fixed income
Balanced	50% equities/50% fixed income
Moderate	60% equities/40% fixed income
Moderate Growth	70% equities/30% fixed income
Growth	80% equities/20% fixed income
Aggressive Growth	90% equities/10% fixed income
Also available on request or for special purposes:	100% bond and 100% stock model portfolios

Please note that the above-listed models may include a relatively small portion allocated to an “alternatives” sleeve. Alternatives are defined as anything that is neither a stock, nor a bond, nor cash. As such they provide the potential to add a level of diversification not possible when limited to stocks, bonds, and cash and may help lower a portfolio’s volatility. Examples include hard assets such as real estate, commodities, currencies, and precious metals, and strategies such as market neutral, managed futures, global macro, and merger arbitrage. Because direct investing in alternatives usually involves lack of ready liquidity, Mallery Financial prefers to access alternatives through mutual funds or ETFs to provide liquidity (important for our ability to re-balance portfolio allocations as well as for your liquidity needs). As an example of the application of alternatives in a portfolio, a 60% equities/40% fixed income portfolio might become 60% equities/30% fixed income/10% alternative investments.

Mallery Financial models may be built through an “overlay” or “sleeve-based” approach, where the final model is made up of sub-models or “sleeves” (for example, a growth stocks sleeve, a defensive stocks sleeve, an income sleeve, an alternatives sleeve, a volatility-stabilizer sleeve, etc.). This approach enables Mallery Financial to actively manage the constituent parts based on prevailing conditions, threats, and opportunities while delivering an integrated model portfolio solution.

Third-Party Money Managers

As stated earlier, we may recommend one or more third-party money manager(s) based on your financial circumstances, investment objectives, risk tolerance, time horizon, liquidity needs, and other factors that may be relevant to your situation. Please refer to each third-party manager's ADV Part 2 for a complete description of their analysis methods and investment strategies.

Risk of Loss

We cannot guarantee our analysis methods will yield a positive return. In fact, loss of principal is always a risk. Investing in securities involves a risk of loss that you should be prepared to bear. Clients must understand that investment decisions made for your Account by us are subject to various market, currency, economic, political, and business risks. The investment decisions we make for you will not always be profitable, nor can we guarantee any level of performance.

A list of all risks associated with the strategies, products, and methodology we offer are listed below:

Analysis Methods Risk

Fundamental Analysis Risk

Fundamental analysis, when used in isolation, has a number of risks:

- An infinite number of factors can affect the earnings of a company and its stock price over time. These can include economic, political, and social factors in addition to the various company statistics.
- The only data available may be out of date (i.e., the necessary current data may not be available).
- It is difficult to give appropriate weightings to the factors.
- It assumes that the analyst is competent.
- It ignores the influence of random events such as oil spills, product defects being exposed, acts of God, and so on.

Modern Portfolio Theory (MPT) Risk

Modern Portfolio Theory tries to understand the market as a whole and measure market risk in an attempt to reduce the inherent risks of investing in the market. However, with every financial investment strategy there is a risk of a loss of principal. Not every investment decision will be profitable, and there can be no guarantee of any level of performance.

Macroeconomic/Cyclical Analysis Risk

Looking at market cycles in conjunction with other investment strategies can be useful when making investment decisions. However, market cycles are not always predictable. Each financial investment strategy has benefits and risks. Not every investment decision will be profitable, and there can be no guarantee of any level of performance.

Technical Analysis risk

- Technical analysis is derived from the study of market participant behavior, and its efficacy is a matter of controversy.

- Methods vary greatly and can be highly subjective; different technical analysts can sometimes make contradictory predictions from the same data.
- Models and rules can incur materially high transaction costs.

Product Risk

Alternative Investment Risk

Direct investing in alternative investments is speculative, not suitable for all clients, and intended for experienced and sophisticated investors who are willing to bear the high economic risks of the investment, which can include:

- Loss of all or a substantial portion of the investment due to leveraging, short-selling, or other speculative investment practices.
- Lack of liquidity (there may be no secondary market for the fund and none expected to develop).
- Volatility of returns.
- Absence of information regarding valuations and pricing.
- Delays in tax reporting.
- Less regulation and higher fees than mutual funds.

Bond Fund Risk

Bond funds generally have higher risks than money market funds, largely because they typically pursue strategies aimed at producing higher yields. The risks associated with bond funds include:

- **Call Risk** — The possibility that falling interest rates will cause a bond issuer to redeem (or “call”) its high-yielding bond before the bond’s maturity date.
- **Credit Risk** — the possibility that companies or other issuers whose bonds are owned by the fund may fail to pay their debts (including the debt owed to holders of their bonds). Credit risk is less of a factor for bond funds that invest in insured bonds or U.S. Treasury bonds. By contrast, those that invest in the bonds of companies with poor credit ratings generally will be subject to higher credit risk.
- **Interest Rate Risk** — the risk that the market value of the bonds will go down when interest rates go up. Interest rate risk means you can lose money in any bond fund, including those that invest only in insured bonds or Treasury bonds.
- **Prepayment Risk** — the chance that a bond will be paid off early. For example, if interest rates fall, a bond issuer may decide to pay off (or “retire”) its debt and issue new bonds that pay a lower rate. When this happens, the fund may not be able to reinvest the proceeds in an investment with a return or yield as high as that of the original bond.

Exchange Traded Fund (“ETF”) Risk

Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF represents a portfolio of securities designed to track a particular market segment or index. ETFs are subject to the following risks that do not apply to conventional funds:

- The market price of the ETF's shares may trade at a premium or a discount to their net asset value.
- An active trading market for an ETF's shares may not develop or be maintained.
- There is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

Mutual Funds Risk

The following is a list of some general risks associated with investing in mutual funds.

- **Country Risk** — The possibility that political events (a war, national elections), financial problems (rising inflation, government default), or natural disasters (an earthquake, a poor harvest) will weaken a country's economy and cause investments in that country to decline.
- **Currency Risk** — The possibility that returns could be reduced for Americans investing in foreign securities because of a rise in the value of the U.S. dollar against foreign currencies. Also called exchange-rate risk.
- **Income Risk** — The possibility that a fixed-income fund's dividends will decline as a result of falling overall interest rates.
- **Industry Risk** — The possibility that a group of stocks in a single industry will decline in price because of developments in that industry.
- **Inflation Risk** — The possibility that increases in the cost of living will reduce or eliminate a fund's real inflation-adjusted returns.
- **Manager Risk** — The possibility that an actively managed mutual fund's investment adviser will fail to execute the fund's investment strategy effectively resulting in the failure of stated objectives.
- **Market Risk** — The possibility that stock fund or bond fund prices overall will decline over short or even extended periods. Stock and bond markets tend to move in cycles, with periods when prices rise and other periods when prices fall.
- **Principal Risk** — The possibility that an investment will go down in value, or "lose money," from the original or invested amount.

Stock Fund Risk

Overall "market risk" poses the greatest potential danger for investors in stocks funds. Stock prices can fluctuate for a broad range of reasons, such as the overall strength of the economy or demand for particular products or services.

Insurance Product Risk

The rate of return on variable insurance products is not stable, but varies with the stock, bond, and money market subaccounts that are selected as investment options. There is no guarantee that you will earn any return on your investment, and there is a risk that you will lose money. Even fixed insurance products carry certain risks or trade-offs. Before you consider purchasing an insurance product, make sure you fully understand all of its terms. Carefully read the prospectus.

Some of the major risks include:

- **Liquidity and Early Withdrawal Risk** — There may be a surrender charges for withdrawals within a specified period, which can be as long as 4–10 years. Any withdrawals before a client reaches the age of 59½ are generally subject to the IRS 10% early withdrawal penalty in addition to any gain being taxed as ordinary income.
- **Sales Charges and Surrender Charges** — Asset-based sales charges or surrender charges normally decline and eventually are eliminated the longer you hold your shares. For example, a surrender charge could start at 7% in the first year and decline by 1% per year until it reaches 0%.
- **Fees and Expenses** — Insurance products may have a variety of fees and expenses, which can reach 2% and more, such as:
 - Mortality and expense risk charges
 - Administrative fees
 - Underlying fund expenses
 - Charges for special features or riders
 - State premium taxes
- **Bonus Credits** — Some products offer bonus credits that can add a specified percentage to the amount invested ranging from 1% to 5% for each premium payment. Bonus credits, however, are usually not free. In order to fund them, insurance companies typically impose high mortality and expense charges, lengthy surrender charge periods, and/or additional insurance rider fees.
- **Guarantees** — Insurance companies provide a number of specific guarantees. For example, they may guarantee a death benefit or an annuity payout option that can provide income for life. These guarantees are only as good as the insurance company that offers them.
- **Market Risk** – The possibility that stock fund or bond fund prices overall will decline over short or even extended periods. Stock and bond markets tend to move in cycles, with periods when prices rise and other periods when prices fall.
- **Principal Risk** – The possibility that an investment will go down in value, or “lose money,” from the original or invested amount.

Overall Risks

Clients need to remember that past performance is no guarantee of future results. All investments carry some level of risk. You may lose some or all of the money you invest, including your principal, because the securities held by a fund will go up and down in value. Dividend or interest payments may also fluctuate, or stop completely, as market conditions change.

Before you invest, be sure to read a fund’s prospectus and shareholder reports to learn about its investment strategy and the potential risks. Funds with higher rates of return may take risks that are beyond your comfort level and be inconsistent with your financial goals.

While past performance does not necessarily predict future results, it can tell you how volatile (or relatively stable) a fund has been over time. Generally, the more volatile a fund, the higher the investment

risk. If you'll need access to your money to meet a financial goal in the near term, you probably can't afford the risk of investing in a fund with a volatile history because you will not have enough time to ride out any declines in the stock market.

Item 9 – Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of us or the integrity of our management. Mallery Financial has no disclosures for the firm or any of our IARs. We adhere to high ethical standards for all of our IARs and associates.

Item 10 – Other Financial Industry Activities and Affiliations

Our firm and our associated persons are not registered, nor do they have an application pending to register, as a broker-dealer, futures commission merchant, commodity pool operator, or commodity trading advisor or representative of any of the foregoing.

Stephen Mallery, the Managing Member and Chief Compliance Officer for Mallery Financial, is a licensed insurance agent/broker with various companies.

Selection of Other Advisers

Where appropriate, we may recommend certain third-party managers to clients. Details of the fees charged by third-party managers are described in Item 5 of this Brochure and in the third-party manager's ADV Part 2 (or equivalent disclosure brochure). We do not receive any additional compensation as a result of recommending any third-party managers to our clients.

Item 11 – Code of Ethics, Participation or Interest in Client Accounts, and Personal Trading

General Information

We have adopted a Code of Ethics for all IARs of the firm describing its high standards of business conduct and fiduciary duty to you, our client. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of significant gifts, the reporting of certain gifts and business entertainment items, and personal securities trading procedures. All of our IARs must acknowledge the terms of the Code of Ethics annually, or as amended.

The following acts are prohibited:

- Employing any device, scheme, or artifice to defraud
- Making any untrue statement of a material fact
- Omitting to state a material fact necessary in order to make a statement, in light of the circumstances under which it is made, not misleading
- Engaging in any fraudulent or deceitful act, practice, or course of business
- Engaging in any manipulative practices

Clients and prospective clients may request a copy of the firm's Code of Ethics by contacting the CCO.

Participation or Interest in Client Accounts

Our compliance policies and procedures prohibit anyone associated with Mallery Financial from having an interest in a client Account or participating in the profits of a client's Account without the approval of the CCO.

Personal Trading

We may recommend securities to you that we will purchase for our own accounts. We may trade securities in our account that we have recommended to you as long as we place our orders after your orders. This policy is meant to prevent us from benefiting as a result of transactions placed on behalf of advisory accounts.

Neither Mallery Financial nor any of its related persons recommend securities (or other investment products) to advisory clients in which we or any related person has some other proprietary (ownership) interest, other than those mentioned above.

Certain affiliated accounts may trade in the same securities with your Accounts on an aggregated basis when consistent with our obligation of best execution. When trades are aggregated, all parties will share the costs in proportion to their investment. We will retain records of the trade Order (specifying each participating account) and its allocation. Completed orders will be allocated as specified in the initial trade order. Partially filled orders will be allocated on a pro rata basis. Any exceptions will be explained on the Order.

Mallery Financial has a personal securities transaction policy in place to monitor the personal securities transactions and securities holdings of "Access Persons" (individuals at Mallery Financial who have access to Client Account information or information related to the Adviser's trading activity). The policy requires that an Access Person of the firm provide the Chief Compliance Officer or his/her designee with a written report of their current securities holdings within ten (10) days after becoming an Access Person. Additionally, each Access Person must provide the Chief Compliance Officer or his/her designee with a written report of the Access Person's current securities holdings at least once each twelve (12) month period thereafter on a date the Adviser selects; provided, however that at any time that the Adviser has only one Access Person, he or she shall not be required to submit any securities report described above.

We have established the following restrictions to ensure that our fiduciary responsibilities regarding insider trading are met:

- No securities for our personal portfolio(s) shall be bought or sold where this decision is substantially derived, in whole or in part, from the role of IARs of Mallery Financial, unless the information is also available to the investing public on reasonable inquiry. In no case, shall we put our own interests ahead of yours.

Privacy Statement

We are committed to safeguarding your confidential information and hold all personal information provided to us in the strictest confidence. These records include all personal information that we collect from you or receive from other firms in connection with any of the financial services they provide. We also require other firms with whom we do business to restrict the use of your information. Our Privacy Policy is available upon request.

Conflicts of Interest

Mallery Financial's IARs may use the same strategy for their personal investment accounts as the firm uses for its Clients. However, IARs may not place their orders in a way to benefit from the purchase or sale of a security executed on behalf of a client.

We act in a fiduciary capacity. If a conflict of interest arises between us and you, our policy is to disclose the potential conflict, and we shall make every effort to resolve the conflict in your favor. Conflicts of interest may also arise in the allocation of investment opportunities among the Accounts that we advise. We will seek to allocate investment opportunities according to what we believe is appropriate for each Account. We strive to do what is equitable and in the best interests of all the Accounts we advise.

Item 12 – Brokerage Practices

Factors Used to Select Custodians

In recommending a custodian/broker-dealer, we look for a company that offers relatively low transaction fees, access to desired securities, trading platforms, and support services. We require Clients to use TD Ameritrade, Folio Institutional, or other platforms with which we have established a trusted relationship as the qualified Custodian for their Accounts when using our asset management services.

Soft Dollars

TD Ameritrade, Folio Institutional, and other platforms provide us with certain brokerage and research products and services that qualify as “brokerage or research services” under the rules. These research products and/or services will assist the IAR in its investment decision making process. Such research generally will be used to service all of the IAR's Clients, but the custodians typically are able to offer such services through the assessment of normal fees paid by the client.

The Adviser participates in the institutional advisor program (the “Program”) offered by TD Ameritrade Institutional. TD Ameritrade Institutional is a division of TD Ameritrade Inc., member FINRA/SIPC (“TD Ameritrade”), an unaffiliated SEC-registered broker-dealer and FINRA member. TD Ameritrade offers to

independent investment advisers services that include custody of securities, trade execution, and clearance and settlement of transactions. Adviser receives some benefits from TD Ameritrade through its participation in the Program.

As disclosed above, Adviser participates in TD Ameritrade's institutional customer program and Adviser may recommend TD Ameritrade to Clients for custody and brokerage services. There is no direct link between Adviser's participation in the program and the investment advice it gives to its Clients, although Adviser receives economic benefits through its participation in the program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Adviser participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to Client Accounts); the ability to have advisory fees deducted directly from Client Accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to Adviser by third-party vendors. TD Ameritrade may also have paid for business consulting and professional services received by Adviser's related persons. Some of the products and services made available by TD Ameritrade through the program may benefit Adviser but may not benefit its Client accounts. These products or services may assist Adviser in managing and administering Client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help Adviser manage and further develop its business enterprise. The benefits received by Adviser or its personnel through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to Clients, Adviser endeavors at all times to put the interests of its Clients first. Clients should be aware, however, that the receipt of economic benefits by Adviser or its related persons in and of itself creates a potential conflict of interest and may indirectly influence the Adviser's choice of TD Ameritrade for custody and brokerage services.

Best Execution

We have an obligation to seek best execution for you. In seeking best execution, the determinative factor is not the lowest possible commission cost but whether the transaction represents the best qualitative execution, taking into consideration the full range of a broker-dealer's services, including the value of research provided, execution capability, commission rates, reputation and responsiveness. Therefore, we will seek competitive commission rates, but we may not obtain the lowest possible commission rates for account transactions.

Brokerage for Client Referrals

In selecting and/or recommending broker-dealers, we do not take into consideration whether we will receive client referrals from the broker-dealer or third party.

Directed Brokerage

We do not permit directed brokerage. We will require you to use the custodian of our choosing as the custodial firm.

Trading

Transactions for each client account generally will be effected independently, unless we decide to purchase or sell the same securities for several clients at approximately the same time. We may (but are not obligated to) combine or “batch” such Orders to obtain best execution, to negotiate more favorable commission rates, or to allocate equitably among our clients’ differences in prices and commission or other transaction costs. Under this procedure, transactions will be price-averaged and allocated among our clients in proportion to the purchase and sale orders placed for each client account on any given day.

Transactions placed in an asset management account by a third-party manager will be executed through their broker-dealer or custodian. In determining best execution for these transactions, the third-party manager is looking at whether the transaction represents the best qualitative execution, taking into consideration the full range of a broker-dealer’s services, including the value of research provided, execution capability, commission rates, and responsiveness. While they look for competitive commission rates, they may not obtain the lowest possible commission rates for account transactions. The aggregation and allocation practices of mutual funds and third-party managers that we recommend to you are disclosed in the respective mutual fund prospectuses and third-party manager disclosure documents which will be provided to you.

Item 13 – Review of Accounts

Reviews

Asset Management Services

Reviews are conducted at least annually or as agreed to by the Adviser and Client. Reviews will be conducted by our Chief Compliance Officer, Stephen Mallery. You may request more frequent reviews and may set thresholds for triggering events that would cause a review to take place. Generally, we monitor for changes and shifts in the economy, changes to the management and structure of a mutual fund or company in which client assets are invested, and market shifts and corrections.

Financial Planning and Insurance Consulting

As part of the financial planning process, we will perform an initial review of your Account information (which you provide us) in the context of the planning process. Subsequent reviews may be scheduled as needed by you and/or Mallery Financial up and until the final plan documentation is provided to you. Once the plan has been provided, the agreement will terminate unless both parties agree to continue the relationship under mutually agreeable terms, which will be formalized through an updated Financial Planning/Consulting Agreement.

Reports

Asset Management Services

You will be provided with custodial statements reflecting the transactions occurring in your Account, Account performance reports, and trade confirmations for each securities transaction executed in the Account by the Custodian, all on at least a quarterly basis. These statements and reports will be delivered

in print or digitally, depending on the delivery options available from the Custodian and what you select when you open the Account. It is your responsibility to notify us of any discrepancies between the statements provided by Mallery Financial and the Custodian(s) or any concerns you have about the Account(s).

Financial Planning and Insurance Consulting

Financial Planning

We will provide a series of reports as we progress through the planning process, culminating in a final printed plan document. During the planning engagement you will have online access to the plan data and projections and the ability to self-direct the generation of other reports through your personal financial website, which we provide to you as part of your financial planning engagement. After the planning project has been completed, together we may negotiate ongoing periodic reviews and/or ongoing access to your personal financial website.

Insurance Consulting

As stated under Item 4 – Advisory Business Introduction – insurance consulting services span the range from in-force policy analysis (suitability, costs, forensics, repair) to new insurance decisions (needs analyses, recommendations on product type/category and material explanations as to why, and, if desired, specific product research). We can also work with you to manage in-force insurance contracts (for example, life insurance and annuities) if you can authorize the insurance company to give us access to policy information. Any reports we deliver will be dictated by the services you engage us to provide.

Item 14 – Client Referrals and Other Compensation

We do not receive any economic benefit from anyone who is not a Client for providing investment advice or other advisory services to our Clients, nor do we directly or indirectly pay any compensation to another person if they refer clients to us.

Item 15 – Custody

We do not have physical custody of any accounts or assets. However, we are deemed to have constructive custody of your Account(s) if we have the ability to instruct the Custodian to deduct your advisory fees from your custodial Account(s). You should receive at least quarterly statements from the broker-dealer or Custodian that holds and maintains your investment assets. We urge you to carefully review such statements and compare the official custodial record with the Account statements that we provide you. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities. If you notice any discrepancies, please contact Mallery Financial.

We do not debit advisory fees directly from your advisory Account. We send information to your Custodian to debit the advisory fees, and the Custodian pays them to us.

Item 16 – Investment Discretion

We manage assets on a discretionary or non-discretionary basis. If you provide discretionary authority, which will be agreed upon and documented in the Investment Advisory Agreement, we will have the authority to determine the following without your consent:

- Securities to be bought or sold for your Account;
- Amount of securities to be bought or sold for your Account; and
- Timing of all securities transactions in your Account.

In all cases this discretion is exercised in a manner consistent with your stated investment objectives and risk tolerance for your Account and in accordance with any restrictions you have placed on your Account.

When Asset Management services are provided on a discretionary basis, you will enter into a separate custodial agreement with the Custodian. The custodial agreement will include a limited power of attorney to trade in your Account(s), which authorizes the Custodian to take instructions from us regarding all investment decisions for your Account.

If you do not give us the authority to manage your Account on a discretionary basis, then we cannot buy or sell any security in your Account without your prior, express permission. Please be advised that lack of discretionary trading authority could adversely affect our ability to take advantage of price swings when attempting to purchase or sell securities in your Account, especially in instances where we are not able to contact you in a timely manner.

When Asset Management services are provided on a non-discretionary basis, you will enter into a separate custodial agreement with the Custodian. The custodial agreement will include a limited power of attorney to trade in your Account(s), which authorizes the Custodian to take instructions from us only regarding trades approved by you.

Any third-party money manager and/or custodians will have discretion over your Account or their part of your Account. The Investment Advisory Agreement and ADV Part 2 of the third-party money manager and the custodial new account documentation will detail the terms of discretion.

Item 17 – Voting Client Securities

As a matter of policy and practice, we do not vote proxies on behalf of advisory clients. You retain the responsibility for receiving and voting proxies for any and all securities maintained in your portfolios. We may provide advice to you regarding your voting of proxies. The Custodian will forward you copies of all proxies and shareholder communications related to your Account assets.

Item 18 – Financial Information

We are required to provide you with certain financial information or disclosures about our financial condition. We have no financial commitment that would impair our ability to meet any contractual and fiduciary commitments to you, our client. We have not been the subject of any bankruptcy proceedings. In no event shall we charge advisory fees that are both in excess of \$500 and more than six months in advance of advisory services rendered.

Item 19 – Requirements for State Registered Advisers

Principals

There is one principal of Mallery Financial, Stephen Mallery. He is the CCO and was born in 1959. His education information, business background, and other business activities can be found in the Form ADV Part 2B Brochure Supplement.

Performance Fees

We do not charge a performance-based fee (fees based on a share of capital gains on, or capital appreciation of, the assets of a client) for our normal asset management accounts.

Disclosable Events

Neither Mallery Financial nor Stephen Mallery has any reportable events to disclose.

Designations

AIF[®] (Accredited Investment Fiduciary) 2019
Center for Fiduciary Studies, LLC (a Fiduciary
360 [fi360] company)

LUTCF[®] (Life Underwriting Training Council Fellow) 2007
The American College

Minimum Designation Requirements

AIF[®] (Accredited Investment Fiduciary[®])

To attain the right to use the Accredited Investment Fiduciary[®] and AIF[®] mark, an individual must fulfill the following requirements:

The AIF designation certifies the recipient's specialized knowledge of fiduciary standards of care and their application to the investment management process. To receive the AIF designation, individuals must complete a training program; successfully pass a comprehensive, closed-book final examination under the supervision of a proctor; and agree to abide by the AIF Code of Ethics. To maintain the AIF designation, the individual must annually renew their affirmation of the AIF Code of Ethics and complete six hours of continuing education credits. The certification is administered by the Center for Fiduciary Studies, LLC (a Fiduciary 360 [fi360] company).

Additional information regarding this designation is available by contacting the Center for Fiduciary Studies, LLC, at www.fi360.com.

LUTCF[®] (Life Underwriter Training Council Fellow)

To attain the LUTCF[®] designation the insurance professional must be a member in good standing with NAIFA (National Association of Insurance and Financial Advisors), complete three eight-week courses, and pass a final exam for each course (online, proctored). The LUTCF[®] issuing organization (The College of Financial Planning) is accredited by the Higher Learning Commissions (HLC) and is a member of the North Central Association (NCA). Additional information regarding this designation is available and complaints may be submitted by email to LUTCF@naifa.org.

Business History

July 2020 – Present	CCO and Investment Advisor Representative at Mallery Financial, LLC
Aug 2013 – Oct 2020	Registered Representative and Investment Adviser Representative at KMS Financial Services, Inc.
May 2011 – Aug 2013	Registered Representative and Investment Advisor Representative at Woodbury Financial Services, Inc.
Sep 2010 – May 2011	Registered Representative at Woodbury Financial Services, Inc.

Item 3 – Disciplinary History

Neither Mallery Financial nor Stephen Mallery has any disciplinary history to disclose.

Item 4 – Other Business Activities

Stephen Mallery may recommend insurance products and may also, as an independent insurance agent, sell those recommended insurance products to Clients. When such recommendations or sales are made, a conflict of interest exists to the extent that the insurance-licensed investment adviser representative (IAR) earns insurance commissions for the sale of those products, which may create an incentive to recommend such products. We require that all IARs disclose this conflict of interest when such recommendations are made. Also, we require IARs to disclose that clients may purchase recommended insurance products from other insurance agents not affiliated with Mallery Financial.

Item 5 – Additional Compensation

Stephen Mallery does not receive any other compensation from someone who is not a client for providing advisory services.

Item 6 – Supervision

Stephen Mallery is the CCO and performs all supervisory duties for his firm.

Item 7 – Requirements for State-Registered Advisers

Stephen Mallery has no reportable events to disclose here.
